PROFILE

Financial Economics master's student who enjoys getting data, processes, and admin work into a clear and workable shape. I have built recurring reports, checks, and simple automation in Excel and Alteryx, and I am comfortable writing documentation, following up actions, and working with people across teams. I learn new tools quickly and like finding practical ways to make everyday work more reliable and efficient.

EDUCATION

MSc Financial Economics — Erasmus University Rotterdam 2025–2026
Relevant coursework: Risk Management, Advanced Investments, Behavioral Finance *Rotterdam, NL*

BSc Economics & Business Economics (IBEB) — Erasmus University 2022–2025
GPA 8.3 (Cum Laude), Thesis 8.5 *Rotterdam, NL*

WORK EXPERIENCE

Total Rewards Intern (Data & Reporting) - IDEXX B.V. Feb–July 2026

- Improved recurring Excel and Alteryx workflows, cutting preparation time by about 40% and making updates more repeatable.
- Prepared recurring and ad hoc Excel analyses, comparison tables, and presentations, checking details before sharing findings with stakeholders.
- Worked with Payroll and Compensation to collect, validate, and map payroll information for EU Pay Transparency readiness.
- Learned Pay Analytics and ServiceNow quickly while coordinating requests, records, and follow-ups with colleagues across Total Rewards.

Project-Based Research Assistant | University of Copenhagen July–Aug 2026

- Built a repeatable Stata workflow to clean and merge VES 2021-2024 data into approximately 3.7 million firm-year records.
- Standardized and documented 181 data mappings across firm, investment, and energy files to keep definitions traceable across years.
- Checked duplicate keys, missing values, outliers, and structural changes before releasing data for analysis and reporting.

PROJECTS

Reporting & Quality-Control Pipeline - Excel, Power Query & Power BI [\[Link\]](#) 2026

- Consolidated data from multiple sources into a repeatable Excel and Power Query workflow for recurring reporting.
- Built cleaning, validation, and consistency checks so issues could be identified before reports were shared.
- Created a Power BI dashboard that made Actual, Budget, and Forecast differences easier to review with stakeholders.
- Documented the update process and controls so the workflow could be repeated without rebuilding it from scratch.

FP&A Planning & Performance Model [\[Link\]](#) 2026

- Built monthly, YTD, and full-year P&L views comparing Actual, Budget, and Forecast across four regions.
- Linked revenue, COGS, OPEX, and EBITDA variances to operational drivers across regions and periods.
- Compared Upside, Base, and Downside scenario impacts on FY2026 revenue, gross margin, and EBITDA by region.
- Built a Power BI dashboard combining executive P&L, variance, and scenario views for management review.

SKILLS

Business & Project Support: Microsoft Excel, Word, PowerPoint, Meeting Notes, Documentation, Action Tracking

Data & Process Improvement: Power Query, Power BI, Data Validation, Reporting, Workflow Improvement

Tools: Alteryx, SQL, Python (pandas); comfortable learning unfamiliar systems and technology

Working Style: Organised, detail-focused, proactive, clear communicator, reliable follow-through

EXTRACURRICULAR ACTIVITIES

B&R Beurs, Erasmus Investment Society – Member 2024–2025

- Practiced company valuation and financial modelling through weekly workshops and market simulations.

- Evaluated investment proposals with peers, discussing company fundamentals, portfolio risk, and market developments.

LANGUAGE

- English (fluent) | Vietnamese (native)
