## PROFILE

Financial Economics master's student with practical experience keeping financial data accurate, building reconciled reports, and turning raw information into clear follow-up actions. I enjoy careful, hands-on finance work, learn new systems quickly, and look for simple ways to reduce manual effort without losing control of the details. Interested in growing in Accounts Receivable and financial operations in a client-focused environment.

## EDUCATION

**MSc Financial Economics** — Erasmus University Rotterdam 2025–2026  
Relevant coursework: Risk Management, Advanced Investments, Behavioral Finance *Rotterdam, NL*

**BSc Economics & Business Economics (IBEB)** — Erasmus University 2022–2025  
GPA 8.3 (Cum Laude), Thesis 8.5 *Rotterdam, NL*

## WORK EXPERIENCE

**Total Rewards Intern (Data & Reporting)** - IDEXX B.V. Feb–July 2026

- Improved recurring Excel and Alteryx workflows, cutting preparation time by about 40% while reducing manual errors.
- Cleaned and validated raw data, maintained comparison tables, and prepared recurring Excel analyses and reports for stakeholders.
- Improved compensation recommendation templates and kept supporting market-data files and documentation organised for recurring use.
- Worked with Payroll and Compensation to collect and check inputs across teams, resolving gaps before reports were finalised.

**Project-Based Research Assistant | University of Copenhagen** July–Aug 2026

- Built a repeatable Stata workflow to clean and merge VES 2021-2024 data into approximately 3.7 million firm-year records.
- Standardized and verified 181 data mappings across firm, investment, and energy files to keep records consistent and traceable.
- Performed checks for duplicates, missing values, outliers, and structural changes before data was used for reporting.

## PROJECTS

**Accounting Close & Financial Reporting Model - Excel & Power Query** [\[Link\]](#) 2026

- Built a Power Query-driven close model using FY2025 general-ledger and subledger data, including AR and AP source data.
- Generated 120 month-end adjustment journals for depreciation, inventory, payroll accruals, and debt or lease interest.
- Produced a post-close trial balance across 93 accounts with total debits and credits of EUR 89.34 million and zero net imbalance.
- Created monthly P&L and year-end balance-sheet reports from reusable Power Query outputs and PivotTables.

**Customer Profitability Analysis | Power BI** [\[Link\]](#) 2026

- Built a Power BI report tracking revenue, gross margin, ARR, NRR, and churn across customer segments.
- Combined customer-level revenue with cost-to-serve and acquisition-cost data to calculate profit after acquisition cost.
- Flagged loss-making customers and linked profitability gaps to service costs and underlying operational drivers.
- Created customer deep dives and management watchlists to highlight portfolio risks and priority actions.

## SKILLS

**Financial Operations:** Financial Data Validation, Reconciliation, Financial Reporting, Month-End Close Support

**Data & Tools:** Excel (Advanced), Power Query, Power BI, Alteryx, SQL, Python (pandas)

**Administration:** Documentation, Record Keeping, Cross-Functional Follow-Up, Clear Written Communication

**Working Style:** Accurate, customer-minded, organised, independent, always looking for practical improvements

## EXTRACURRICULAR ACTIVITIES

**B&R Beurs, Erasmus Investment Society – Member** 2024–2025

- Practiced company valuation and financial modelling through weekly workshops and market simulations.

- Evaluated investment proposals with peers, discussing company fundamentals, portfolio risk, and market developments.
