PROFILE

Analytical Financial Economics master's student who enjoys working with operational data and turning it into clear, useful reporting. I have built repeatable Excel, Power Query, and Power BI workflows, with strong attention to data accuracy and follow-through. I learn new systems quickly and like finding sensible automation that makes everyday processes more reliable and effective.

EDUCATION

MSc Financial Economics — Erasmus University Rotterdam 2025–2026
Relevant coursework: Risk Management, Advanced Investments, Behavioral Finance *Rotterdam, NL*

BSc Economics & Business Economics (IBEB) — Erasmus University 2022–2025
GPA 8.3 (Cum Laude), Thesis 8.5 *Rotterdam, NL*

WORK EXPERIENCE

Total Rewards Intern (Data & Reporting) - IDEXX B.V. Feb–July 2026

- Improved recurring Excel and Alteryx workflows, cutting preparation time by about 40% and making updates more repeatable.
- Prepared and checked recurring and ad hoc Excel analyses, comparison tables, and reports for Total Rewards stakeholders.
- Collected, validated, and mapped payroll information with Payroll and Compensation teams for EU Pay Transparency readiness.
- Maintained an EU Pay Transparency tracker, incorporated weekly updates, and communicated relevant changes to the team.

Project-Based Research Assistant | University of Copenhagen July–Aug 2026

- Built a repeatable Stata workflow to clean and merge VES 2021-2024 data into approximately 3.7 million firm-year records.
- Standardized and verified 181 data mappings across firm, investment, and energy files, documenting definitions and comparability.
- Checked duplicates, missing values, outliers, and structural changes to keep operational data reliable for analysis.

PROJECTS

FP&A Planning & Performance Model [\[Link\]](#) 2026

- Built a driver-based Excel model covering Actual, Budget, and multiple Forecast versions across four regions.
- Created linked P&L schedules from revenue through COGS, gross profit, payroll, non-payroll OPEX, and EBITDA.
- Added data-quality controls for Actual-to-Forecast cutovers, customer and FTE roll-forwards, scenario tie-outs, and P&L reconciliation.
- Built executive Power BI views linking P&L performance and operational KPIs to variance drivers and management commentary.

Procurement & Spend Analytics - Power BI [\[Link\]](#) 2026

- Built a four-page Power BI report tracking spend, budget variance, realized and pipeline savings, contract coverage, and on-time delivery.
- Analyzed price leakage, off-contract, emergency, and maverick spend across categories, suppliers, channels, and business units.
- Created supplier-risk views combining delivery reliability, quality, cost, contract status, and single-source exposure.
- Used category and supplier drill-downs to explain whether adverse spend outcomes came from price, volume, compliance, mix, or concentration.

SKILLS

Operational Reporting: Excel (Advanced), Power Query, Power BI, KPI Analysis, Data Validation, Reconciliation
Analysis & Automation: Alteryx, SQL, Python (pandas), Repeatable Workflows, Quality Controls
Business Support: Documentation, Clear Reporting, Cross-Functional Coordination, Structured Problem-Solving

Working Style: Detail-focused, organised, proactive, adaptable, quick to learn new systems

EXTRACURRICULAR ACTIVITIES

B&R Beurs, Erasmus Investment Society – Member 2024–2025

- Practiced company valuation and financial modelling through weekly workshops and market simulations.
- Evaluated investment proposals with peers, discussing company fundamentals, portfolio risk, and market developments.

LANGUAGE

- English (fluent) | Vietnamese (native)
